

Gold Coast Educators Partner With Leading Sports Company To Help Our Future Olympians

Pelleres Tuesday, May 10th, 2022

Today, Brisbane based sports company Grand Final Technologies (GFT) announced they have joined forces with one of Gold Coast's leading registered training organisations, Prestige Service Training (PST), to launch an upcoming fitness program aimed at helping our future Olympic athletes.

"The program is specifically designed to meet the future needs of coaches." Said Mepi Faoagali, General Manager of GFT.

"Home and park-based fitness, one-on-one and small group training have exploded in the last 3 years. The industry needs to adapt to the changing demands of customers."

"Sports Clubs that offer pathways for athletes to reach full potential will benefit most." Said Mepi Faoagali. "The initiative provides an education, certification, and mentoring program for Clubs to prepare athletes for life after their sporting careers."

Tracy Kearny, CEO of PST said, "We're delighted to be partnering with one of Australia's leading wearable weights companies. We are excited to be helping athletes in their dual careers, enabling them to follow their sporting dreams and work part-time in the fitness industry."

"Sports Clubs are such an important part of our community. I support any initiative that helps the survival and growth of community clubs. In providing employment and career pathways for athletes following their dreams, or transitioning out of their sport, it's extremely important to support our local sports clubs." says Matty Denny, Australian Olympian & Pelleres Ambassador.

"We want to help sports clubs who are struggling. Mentoring and employment programs are great for mental health. The life and business skills experienced will be beneficial on and off the field." Adam Bowcutt, Communications Director, Pelleres.

The benefits of this new partnership include.

- An education, employment, and mentoring program for up and coming sportsmen and women.
- A program directly targeting the community to get more active and healthier using innovative systems and devices developed in Queensland.
