

SECURA-LOCK

Automatic garage locking system providing enhanced security for you, your family and your home.

Enhanced security for you, your family and your home.

Secura-Lock

DOOR TYPES: Double or Single Sectional Garage Doors

Make your garage the safest place to store your valuable belongings.

Garages can often be the entry point for intruders as they not only contain high value and portable items such as cars and bikes, but also can often provide internal and discrete access to your home. The Marantec Secura-Lock offers you security and peace of mind.

HOW IT WORKS

The Marantec Secura-Lock has been designed using advanced German technology and will automatically engage when you close your door using your remote control.

The locking pin extends when the door reaches the closed position, providing you additional security and protection.

When opening, the locking pin will automatically retract, disengaging the Secura-Lock and allowing the door to raise to position.

The Secura-Lock is compatible with Marantec Sectional Door Openers.
